

What is claimed is:

1. Golf shoes comprising a sealed bag provided at an area of a foot sole which becomes a fulcrum at a side for bracing during a period from a top swing to a finish, said sealed bag being arranged such that air can be injected thereinto and exhausted therefrom, whereby a portion corresponding to said area is raised by inflating said sealed bag by injecting air into it.

2. The golf shoes as claimed in claim 1 wherein as means for injecting and exhausting air to and from said sealed bag, a hand pump and a release valve are provided.

3. The golf shoes as claimed in claim 2 wherein said hand pump and said release valve are buried in a tongue.
